

## EMERGENCY COMMAND AND CONTROL SYSTEM

5

### Abstract of the Disclosure

10 An emergency command and control system (30) includes a  
plurality of positioning subsystems (32,34,36). Each of the plurality of  
positioning subsystems (32,34,36) has a receiver and a transmitter and  
transmits positioning signal (38). A wearable tag (40) is capable of  
receiving the positioning signal (38) from several of the plurality of  
positioning systems (32,34,36) . The wearable tag (40) transmits a tag  
position. A console (42) contains a computer (44) and a receiver capable  
15 of receiving the tag position.
